# Motivação e Caracterização do Problema

- Desenvolvimento baseado em componentes;
- Falta de Informação (Testes)
  - Desenvolvedor do componente;
  - Usuário do Componente.

# Objetivo

- Propostas Metadados;
- Disponibilizar:
  - Informações de cobertura dos requisitos de teste;
  - Descrição informal de cada casos de teste.

# Premissa

# Descrição do Processo

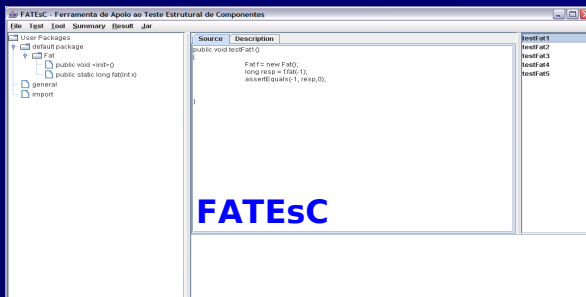

Código do componente

Casos de teste do componente

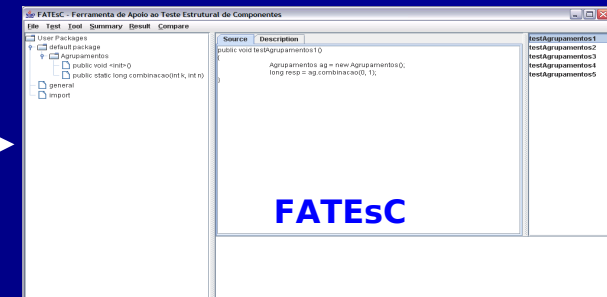

Descrição dos casos de teste

# Componente Fat

```
public class Fat
{
    public long fat(int x)
    {
        if ( x < 0 || x > 20 )
            return -1;
        if ( x == 0 )
            return 1;
        if ( x <= 2 )
            return x;
        long s = 1;
        while ( x > 1 )
        {
            s *= x;
            x--;
        }
    }
}
```

Process Completed

# Resultados Obtidos

The screenshot shows a window titled 'Summary' with a close button in the top right corner. Below the title bar, there are seven radio buttons for selecting different test categories: 'All-Nodes-ei', 'All-Edges-ei' (which is selected), 'All-Uses-ei', 'All-Pot-Uses-ei', 'All-Nodes-ed', 'All-Edges-ed', 'All-Uses-ed', and 'All-Pot-Uses-ed'. Below the radio buttons, the text 'Agrupamentos.combinacao(II)J' is displayed. A table with three columns: 'Test Name', 'Coverage', and 'Percentage' is shown. The table contains five rows of data, including individual test results and a 'TOTAL' row.

Test Name	Coverage	Percentage
testAgrupamentos1	1 of 6	16%
testAgrupamentos2	2 of 6	33%
testAgrupamentos3	3 of 6	50%
testAgrupamentos4	3 of 6	50%
<b>TOTAL</b>	<b>6 of 6</b>	<b>100 %</b>

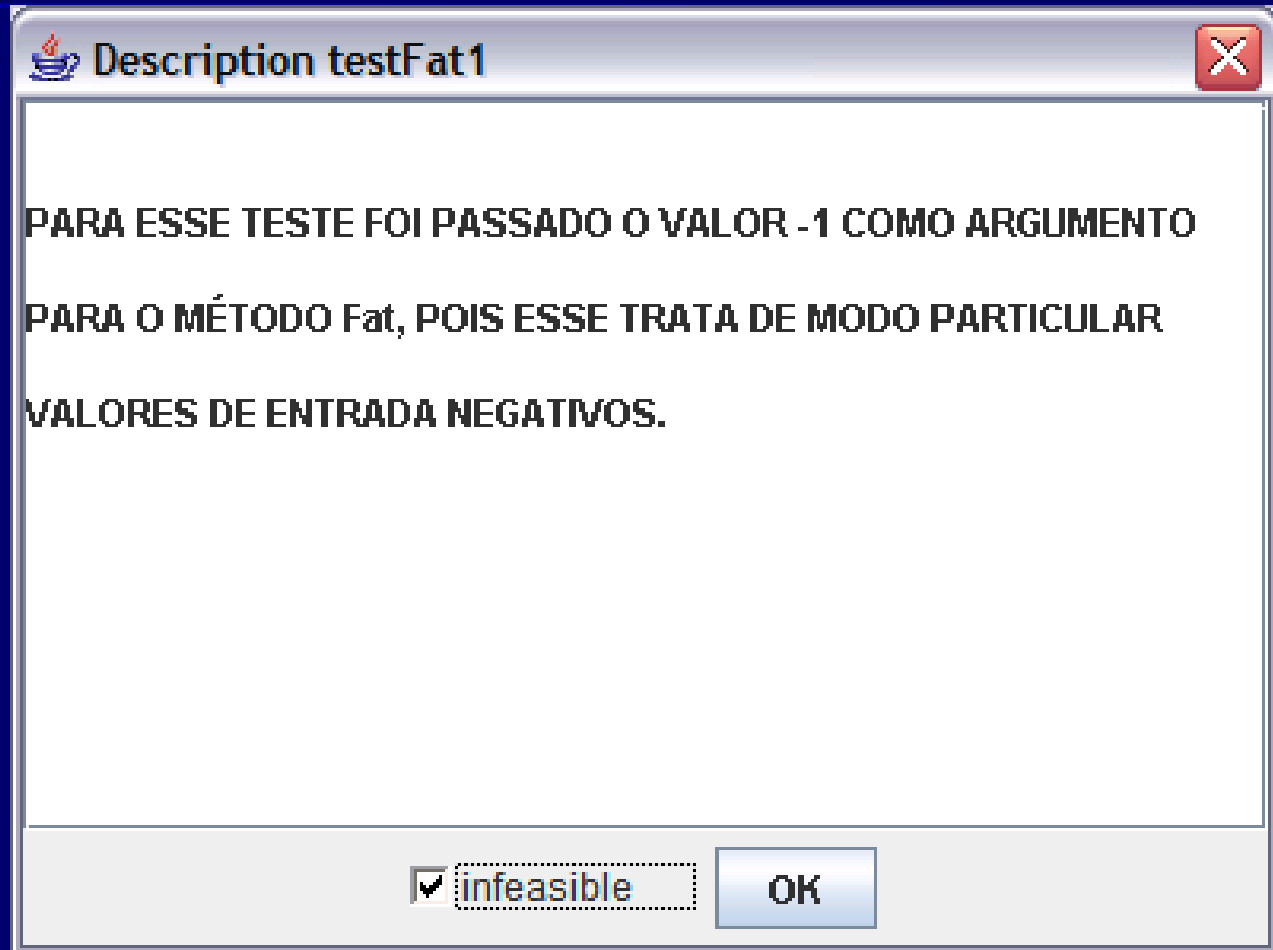

# Comparação

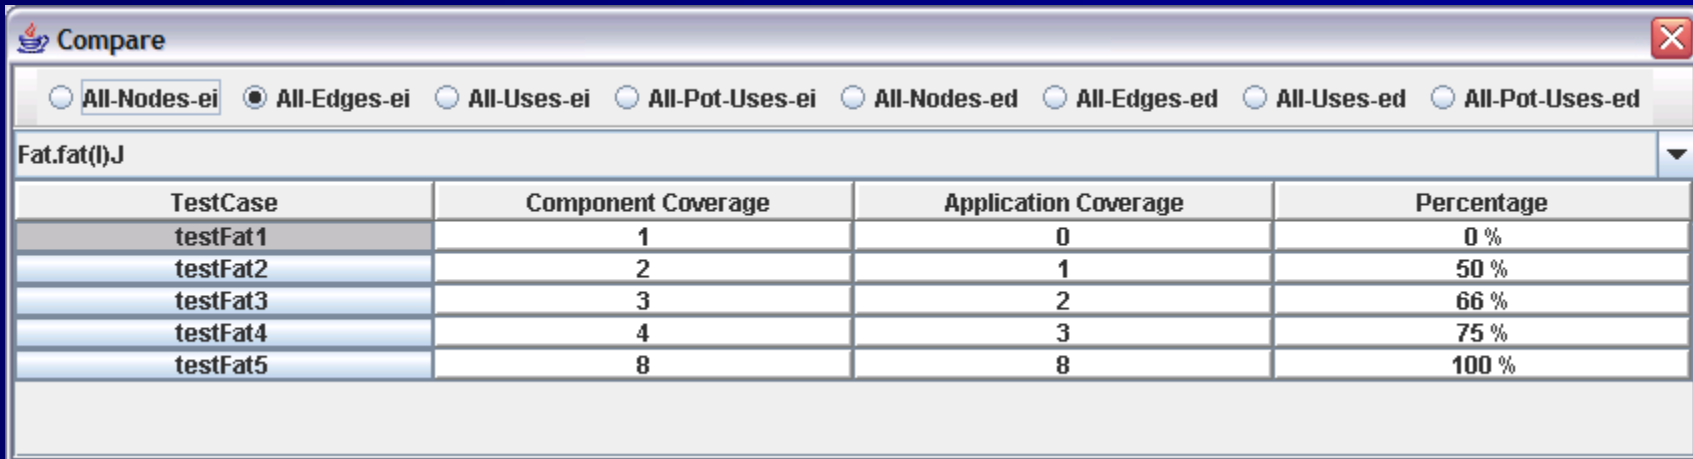

The screenshot shows a 'Compare' dialog box with a table of test case coverage data. The dialog has a title bar with a close button and a menu bar with radio buttons for different comparison criteria. The table has four columns: TestCase, Component Coverage, Application Coverage, and Percentage. The data is as follows:

TestCase	Component Coverage	Application Coverage	Percentage
testFat1	1	0	0 %
testFat2	2	1	50 %
testFat3	3	2	66 %
testFat4	4	3	75 %
testFat5	8	8	100 %

# Análises

# Análises

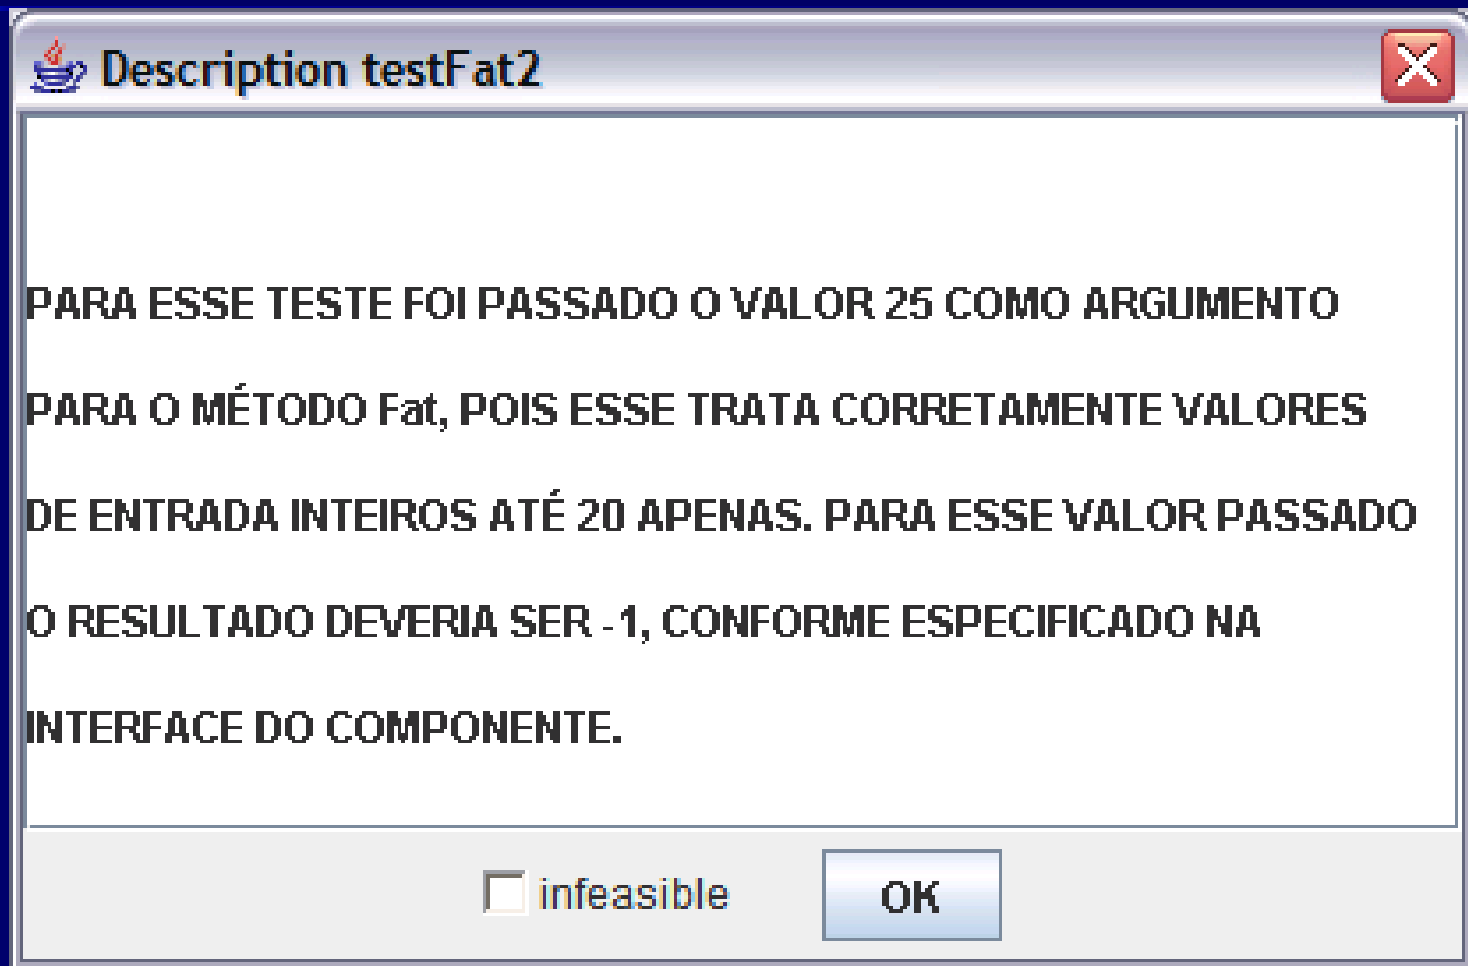

The screenshot shows a window titled "Compare" with a close button in the top right corner. Below the title bar, there are eight radio buttons for selecting analysis criteria: "All-Nodes-ei", "All-Edges-ei" (selected), "All-Uses-ei", "All-Pot-Uses-ei", "All-Nodes-ed", "All-Edges-ed", "All-Uses-ed", and "All-Pot-Uses-ed". Below the radio buttons, the text "Fat.fat(l)J" is displayed with a dropdown arrow. A table with four columns is shown below: "TestCase", "Component Coverage", "Application Coverage", and "Percentage". The table contains five rows of data for test cases testFat1 through testFat5.

TestCase	Component Coverage	Application Coverage	Percentage
testFat1	1	0	0 %
testFat2	2	1	50 %
testFat3	3	2	66 %
testFat4	4	3	75 %
testFat5	8	8	100 %
