
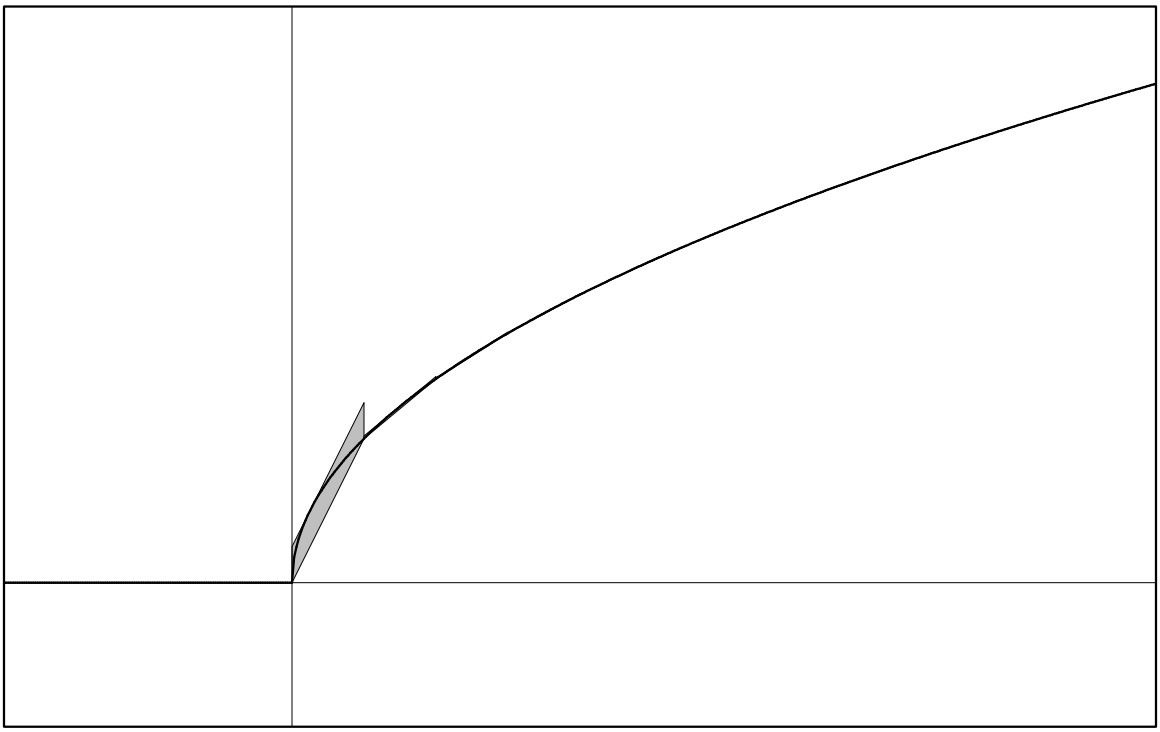
g(x) = sqrt(x)

x in [-1.000000 _ 3.000000] y in [-0.500000 _ 2.000000] 16 intervals

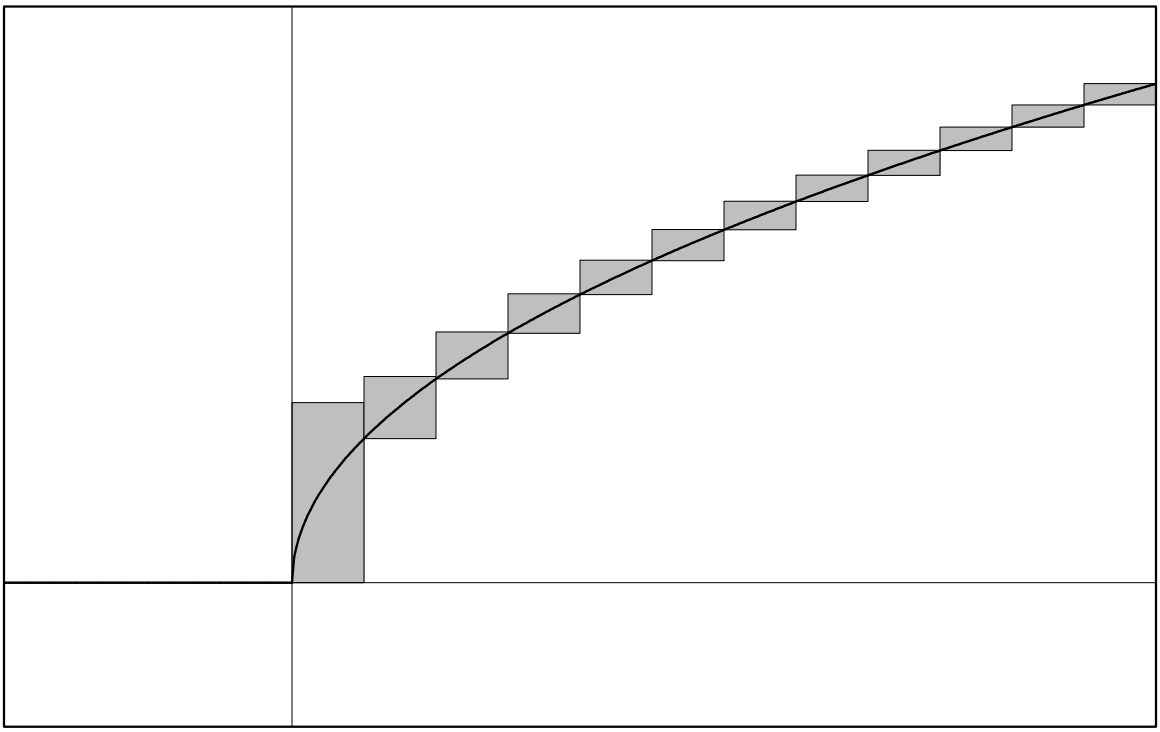
Ordinary interval arithmetic



g(x) = sqrt(x)

x in [-1.000000 _ 3.000000] y in [-0.500000 _ 2.000000] 16 intervals

Affine arithmetic



g(x) = sqrt(x)

x in [-1.000000 _ 3.000000] y in [-0.500000 _ 2.000000] 16 intervals

Affine arithmetic (converted to intervals)
